

One And Only Dance Production

This CD contains full DAW sessions for both PC and Mac demonstrating the usage of Waves processors in production.

The directory of this CD is structured as following:

The [Mac Sessions](#) folder contains sub-folders consisting of full sessions on Cubase SX, Logic Audio, Nuendo and Pro Tools and a [Plug Ins Presets](#) folder containing the presets used in the song.

The [PC Sessions](#) folder contains sub-folders consisting of full sessions on Cubase SX, Logic Audio, Nuendo, and Sonar and a [Plug Ins Presets](#) folder containing the presets used in the song.

The [One-And-Only Audio](#) folder, located inside the [Audio](#) folder, contains the audio tracks of the Take It Away song.

Opening the Sessions

Before launching any session, please copy the [One-And-Only Audio](#) folder to your hard drive. For your convenience, we recommend copying the session file (the one suitable for your specific audio software) as well to any location on your hard drive.

To launch a session, double-click its icon.

When launching a session, you will be prompted by your audio software to locate the song's audio files. Locate and select the [One-And-Only Audio](#) folder residing on your hard drive as the appropriate one.
